

KROZENDA

MULTI-VENDOR B2B & B2C MARKETPLACE

Privacy Policy

How Krozenda collects, uses, stores, shares and protects the personal data of buyers, sellers, dropshipping partners and visitors across our website and mobile applications.

Prepared in accordance with the Digital Personal Data Protection Act, 2023, the Information Technology Act, 2000 and the rules made thereunder, and the Consumer Protection (E-Commerce) Rules, 2020.

Document	Privacy Policy
Platform	Krozenda — web, Buyer App (Android/iOS), Seller App (Android/iOS)
Operated by	[Legal Entity Name Pvt. Ltd.]
Version	1.0 (Draft for client review)
Effective date	[DD Month YYYY]
Last updated	[DD Month YYYY]
Governing law	Laws of India · Jurisdiction: [City, State]

Note for the client. This is a drafting template prepared to reflect how the Krozenda platform actually handles data — the user roles, the KYC flow, and the five third-party integrations that are in scope. Every field highlighted like [this] must be completed with your entity's real details, and the finished text should be reviewed and signed off by your legal counsel before it is published or relied upon. Under the agreed project scope, final legal policy text is a client-owned deliverable.

1. Introduction and scope

Krozenda ("Krozenda", "we", "us", "our") operates an online marketplace on which retail customers and business buyers purchase products from independent sellers, dropshipping partners and from Krozenda's own inventory. This Privacy Policy explains what personal data we collect from you, why we collect it, who we share it with, how long we keep it, and the rights you have over it.

This policy applies to:

- the Krozenda website at [\[https://www.krozenda.com\]](https://www.krozenda.com);
- the Krozenda Buyer mobile applications for Android and iOS;
- the Krozenda Seller mobile applications for Android and iOS;
- the Seller Panel and Admin Panel used by our vendors and staff; and
- any email, SMS, push notification or customer-support interaction that arises out of your use of the above.

It applies to everyone who uses the platform: retail (B2C) customers, business (B2B) buyers such as dealers, distributors, traders and wholesalers, marketplace sellers, dropshipping partners, manufacturers, companies, and visitors who browse without registering.

By creating an account, placing an order, listing products, or otherwise using the platform, you confirm that you have read and understood this policy. Where the law requires your consent, we will ask for it separately and clearly — your continued use of the platform is not by itself treated as consent to anything for which the law requires a distinct, informed choice.

2. Who we are

The platform is owned and operated by [\[Legal Entity Name Pvt. Ltd.\]](#), a company incorporated under the Companies Act, 2013, with CIN [\[CIN\]](#) and registered office at [\[Full registered address, City, State, PIN\]](#).

For the purposes of the Digital Personal Data Protection Act, 2023 ("DPDP Act"), [\[Legal Entity Name Pvt. Ltd.\]](#) is the **Data Fiduciary** in respect of the personal data described in this policy, and you are the **Data Principal**. Certain data is also processed independently by sellers and by our service providers — this is explained in sections 8 and 11.

3. Definitions

Term	Meaning
Personal data	Any data about an individual who is identifiable by or in relation to that data.
Processing	Any operation performed on personal data — collection, storage, use, sharing, alteration, erasure.
Data Principal	The individual to whom the personal data relates — you.
Data Fiduciary	The person who determines the purpose and means of processing — Krozenda.
Data Processor	A person who processes personal data on our behalf, such as our payment or logistics partner.
Buyer	A retail (B2C) customer or a business (B2B) buyer purchasing on the platform.
Seller / Vendor	A marketplace seller, dropshipping partner, manufacturer or company that lists and sells products on the platform.
KYC data	Identity and business-verification documents submitted by sellers for onboarding approval.

4. Personal data we collect

We collect only the data we need to run the marketplace. What we collect depends on who you are and what you do.

4.1 Account and identity data (all users)

- Full name.
- Mobile number, used for OTP-based login and order notifications.
- Email address, used for verification, order confirmations and account notices.
- Password — stored only as a one-way cryptographic hash. We never store, and cannot recover, your plaintext password.
- Your role and capabilities on the platform (for example: retail customer, B2B buyer, seller, dropshipping partner) and your account status.
- Profile photo and display preferences, if you choose to add them.

4.2 Order, delivery and transaction data (buyers)

- Delivery addresses saved in your address book — recipient name, contact number, full address, landmark, city, state and PIN code.
- Billing address and, for B2B buyers, GSTIN and registered business name for tax invoicing.
- Order history: products ordered, quantity, price paid, applicable taxes and discounts, order status, and the seller each item was fulfilled by.
- Shipment and tracking details, including AWB number, courier assigned and delivery status.
- Returns, replacement and cancellation requests, and the reasons you give for them.
- Refund records and payment references.

4.3 Seller and business data (sellers and dropshipping partners)

- Store name, business model, business type and contact details of the authorised person.
- Pickup and warehouse addresses.
- KYC documents — see section 10 for the full list and how they are handled.
- Bank account details, or the payment-partner linked-account identifier used to settle your sales proceeds.
- Commission, settlement and payout records.
- Product listings, inventory and pricing data you upload.

4.4 Content you create

- Product reviews, star ratings and any photographs you attach to a review.
- Questions, support tickets, complaints and the correspondence relating to them.
- Wishlist, cart contents and saved items.

4.5 Technical and usage data

- IP address, browser type and version, operating system, device model and device identifiers.
- Application and server log data — pages and screens viewed, features used, referring URL, date and time of access, and error diagnostics.
- Firebase Cloud Messaging (FCM) push token, used only to deliver notifications to your device.
- Approximate location derived from your IP address, used for delivery serviceability checks and fraud prevention. We do not collect precise GPS location unless you explicitly grant that permission in the mobile app for address auto-fill, and you can withdraw it at any time in your device settings.

4.6 Consent and compliance records

When you accept our Terms & Conditions, this Privacy Policy, the Vendor Agreement, or our Shipping and Return policies, we record the fact of acceptance together with the timestamp, the IP address from which it was given, and the version of the document you accepted. We keep this record as proof of consent, which the law requires us to be able to demonstrate.

What we do not collect. We do not collect your card number, CVV, card expiry, UPI PIN, net-banking password or any other payment credential — these are entered directly on our payment partner's secure interface and never reach Krozenda's servers. We do not sell your personal data to anyone, and we do not use your data to build profiles for third-party advertisers.

5. How we collect it

Source	Examples
Directly from you	Registration, profile edits, address book entries, KYC uploads, orders, reviews, support requests.
Automatically	Server and application logs, cookies and similar technologies, device and push identifiers.
From our service providers	Payment status and refund confirmations from our payment gateway; shipment tracking events from our logistics partner; OTP delivery status from our SMS provider.
From sellers	Fulfilment updates, invoice details and tracking information relating to your order.
From you, about others	If you enter someone else's delivery address or contact number, you confirm that you have their permission to share it with us for that delivery.

6. Why we use your data

We use personal data only for the purposes set out below, and only for as long as those purposes require.

Purpose	What this involves	Basis
Creating and securing your account	Registration, OTP verification of your mobile number, email verification, login, password reset, and detecting unauthorised access.	Consent / performance of our contract with you
Processing orders	Placing and splitting orders across sellers, collecting payment, generating invoices, arranging pickup and delivery, handling returns, replacements, cancellations and refunds.	Performance of contract
Delivery	Sharing the delivery name, address and contact number with the fulfilling seller and the courier so your order can physically reach you.	Performance of contract
Seller onboarding and approval	Reviewing KYC documents, approving or rejecting an application with reasons, and setting up the settlement account.	Legal obligation / contract
Settlement and accounting	Calculating commission, taxes and payouts, maintaining financial records, and GST reporting including TCS and TDS where applicable.	Legal obligation
Service communications	Sending OTPs, order confirmations, dispatch and delivery updates, refund and settlement notices, and important account or policy notices.	Performance of contract
Customer support	Responding to your queries and complaints, and investigating disputes between buyers and sellers.	Contract / legitimate use
Safety and fraud prevention	Detecting fraudulent orders, fake reviews, payment fraud, account takeover and misuse of the platform.	Legal obligation / legitimate use

Purpose	What this involves	Basis
Improving the platform	Analysing aggregated usage to fix defects, improve search and recommendations, and plan features. Wherever possible this is done on aggregated or de-identified data.	Consent / legitimate use
Marketing	Sending offers, promotions and product recommendations — only where you have opted in, and always with a way to opt out.	Consent
Legal compliance	Meeting obligations under tax, consumer protection, information technology and data protection law, and responding to lawful requests from courts and authorities.	Legal obligation

We will not use your personal data for a materially different purpose without first telling you and, where the law requires it, obtaining your fresh consent.

7. Consent and how to withdraw it

Where we rely on your consent, we ask for it through a clear affirmative action — for example, ticking a checkbox at registration or opting in to marketing messages. We do not use pre-ticked boxes.

You may withdraw your consent at any time, and withdrawing it is as easy as giving it. You can do so from your account settings, by using the unsubscribe or STOP option in any marketing message, or by writing to our Grievance Officer at the address in section 22.

Withdrawing consent does not affect the lawfulness of anything we did before you withdrew it. Please also note that some data is necessary for the platform to function, or is required by law: if you withdraw consent for that data, we may no longer be able to provide you with the relevant service, and we may still need to retain certain records — tax invoices, for example — for the periods described in section 14.

8. Who we share your data with

We share personal data only where it is necessary, and only with the categories of recipients set out below. **We do not sell your personal data.**

8.1 Sellers and dropshipping partners

When you place an order, we share with the seller fulfilling it only what they need to fulfil and invoice it: the recipient's name, delivery address and contact number, the items and quantities ordered, and the order reference. Sellers are contractually required to use this data solely to fulfil your order and to comply with applicable data protection law. They are not permitted to market to you independently on the basis of that data.

8.2 Service providers

The platform relies on the third-party services below. Each processes only the data listed, and each is bound by contract to protect it.

Provider	Purpose	Data shared
Razorpay	Payment processing and vendor settlement	Order amount and reference, and your name, email and mobile number. Card, UPI and net-banking credentials are collected directly by Razorpay

Provider	Purpose	Data shared
		and never by us. Seller bank and KYC details are shared to onboard the settlement account.
Shiprocket	Shipping, courier allocation and tracking	Recipient name, delivery address, contact number, order contents and weight, and the seller's pickup address.
SMS India Hub	Transactional SMS and OTP delivery	Mobile number and the message content (OTP, order status).
Firebase Cloud Messaging	Push notifications	Device push token and the notification content. Used for push delivery only.
Email (SMTP)	Transactional email	Email address and the message content.
Hosting and cloud infrastructure	Running and backing up the platform	Hosted data at rest and in transit, under contractual confidentiality and security obligations.

8.3 Legal and protective disclosures

We may disclose personal data where we are required or permitted to do so:

- to comply with a law, regulation, court order, or a lawful request from a government or law-enforcement authority;
- to enforce our Terms & Conditions or Vendor Agreement, or to establish, exercise or defend legal claims;
- to prevent or investigate fraud, security incidents, or activity that threatens the safety of any person; and
- to our professional advisers — auditors, lawyers and accountants — under a duty of confidentiality.

8.4 Business transfers

If Krozenda is involved in a merger, acquisition, restructuring or sale of assets, personal data may be transferred to the acquiring entity. We will notify you before your data becomes subject to a materially different privacy policy, and the acquiring entity will remain bound by the protections described here until you are told otherwise.

9. Payment information

All payments on Krozenda are made online through our payment gateway. Supported methods include UPI, credit card, debit card, net banking and wallets.

- Card numbers, CVV, UPI PINs and net-banking credentials are entered on the payment gateway's own PCI-DSS compliant interface. **Krozenda never receives, sees or stores them.**
- We store only the payment reference identifier, the amount, the payment status and the timestamp, so that we can reconcile your order, process refunds and maintain accounting records.
- Where the gateway offers tokenisation for saved cards, the token is held by the gateway under RBI's card-on-file tokenisation rules, not by us.
- Vendor proceeds are settled through the gateway's split-settlement facility directly to the seller's verified linked account. To enable this, a seller's business and bank details are shared with the gateway for its own

KYC.

10. KYC and business verification data

Sellers, dropshipping partners, manufacturers and companies must complete verification before their storefront is activated. Depending on the category and business type, we collect:

- PAN card;
- Aadhaar or another accepted government photo identity document;
- GST registration certificate;
- FSSAI licence, for sellers listing food products;
- a cancelled cheque or bank account proof;
- address proof for the registered and pickup addresses; and
- business incorporation or partnership documents, where applicable.

How this data is handled:

- KYC documents are reviewed manually by our authorised Admin staff. Access is restricted to the staff members whose role requires it, and that access is logged.
- Documents are stored in encrypted form and are never published, listed, or made visible to buyers or to other sellers.
- Where an identity document is used, we collect it only for the stated verification purpose, retain only what is necessary, and handle it in accordance with the law governing that document. We do not use it as a general-purpose identifier across the platform.
- We may be required to retain KYC and related transaction records for the statutory periods described in section 14, even after a seller account is closed.

11. Sellers as independent data handlers

Krozenda is a marketplace. For products sold by independent sellers and dropshipping partners, the contract of sale is between you and that seller. Once we pass on the delivery details necessary to fulfil your order, the seller also becomes responsible, in its own right, for how it handles that data — including its own invoicing, packaging and courier handover.

We require every seller, as a condition of onboarding, to handle buyer data lawfully, to use it only for order fulfilment, to keep it secure, and not to retain it longer than necessary. We are not, however, responsible for a seller's own independent privacy practices outside the platform. If you believe a seller has misused your data, tell us through the grievance channel in section 22 and we will investigate and act, which may include suspending or removing the seller.

12. Cookies and similar technologies

We use cookies and similar technologies on the website for the following purposes:

Type	What it does	Can you refuse?
Strictly necessary	Keeps you logged in, maintains your session and cart, and protects against cross-site request forgery.	No — the platform will not work without these.
Preference	Remembers your language, region and display choices.	Yes
Analytics	Helps us understand which pages and features are used, so we can fix and improve them.	Yes

You can control cookies through your browser settings and, where we present one, through our cookie consent banner. Blocking strictly necessary cookies will prevent you from logging in or checking out. Our mobile apps do not use browser cookies, but do use local device storage and the push token described in section 4.5.

13. Marketing, SMS, email and push notifications

We distinguish clearly between two kinds of messages:

- **Transactional messages** — OTPs, order confirmations, dispatch and delivery updates, refund and settlement notices, security alerts, and policy changes. These are part of the service. You cannot opt out of them while you hold an active account, because they are how we tell you what is happening with your money and your orders.
- **Promotional messages** — offers, discounts, recommendations and newsletters. These are sent only if you opt in, and every one carries an unsubscribe link, a STOP keyword, or a notification toggle you can switch off at any time.

All transactional SMS is sent through TRAI DLT-registered sender IDs using pre-approved templates, as Indian telecom regulation requires. You can disable push notifications entirely from your device's operating-system settings.

14. How long we keep your data

We keep personal data only as long as it is needed for the purpose it was collected for, or for as long as the law requires us to keep it — whichever is longer. When neither applies, we erase it or irreversibly anonymise it.

Category	Retention period	Reason
Account profile data	For the life of the account, then [90] days after closure	To let you reactivate, and to resolve any pending dispute.
Order, invoice and tax records	[8] years from the end of the relevant financial year	Required under GST and income-tax record-keeping rules.
Payment and settlement records	[8] years	Financial audit and reconciliation.

Category	Retention period	Reason
Seller KYC documents	Duration of the relationship, plus [5] years	Statutory verification and audit obligations.
Consent and policy-acceptance records	As long as we rely on that consent, plus [3] years	To demonstrate valid consent if it is challenged.
Support tickets and complaints	[3] years from closure	Consumer protection and dispute resolution.
Server and security logs	[180] days	Security monitoring and incident investigation, per IT Act requirements.
Reviews and ratings	Until you delete them or your account is closed	Reviews may be retained in anonymised form to preserve product ratings.
Marketing preferences	Until you withdraw consent, plus a suppression record	So that we can honour your opt-out.

15. How we protect your data

We apply technical and organisational security measures appropriate to the risk, including:

- **Encryption in transit** — all traffic between your device and our servers uses HTTPS/TLS.
- **Encryption at rest** — KYC documents and other sensitive data are stored encrypted.
- **Password protection** — passwords are stored only as salted one-way hashes, and are never recoverable in readable form.
- **Access control** — role-based permissions restrict staff access to the minimum needed for their job, with separate Super Admin, Admin and Staff privilege levels.
- **Audit trails** — administrative actions on sensitive records are logged.
- **Platform hardening** — security headers, rate limiting on authentication and OTP endpoints, input validation, and protection against common web attacks.
- **Payment isolation** — payment credentials are handled entirely by our PCI-DSS compliant gateway and never touch our infrastructure.
- **Backups** — regular encrypted backups, with tested restoration.
- **Vendor diligence** — service providers are contractually bound to confidentiality and security obligations.

No system can be guaranteed completely secure. You also have a part to play: keep your password confidential, never share your OTP with anyone (Krozenda staff will never ask you for it), and tell us immediately if you suspect unauthorised access to your account.

16. Your rights

Subject to the DPDP Act and other applicable law, you have the following rights over your personal data.

Right	What it means
Right to access	To obtain a summary of the personal data we process about you, the processing activities involved, and the identities of the other Data Fiduciaries and processors with whom it has been shared.
Right to correction	To have inaccurate or misleading data corrected, incomplete data completed, and outdated data updated.
Right to erasure	To have your personal data erased where it is no longer needed for the purpose it was collected for and no law requires us to keep it.
Right to withdraw consent	To withdraw consent at any time, as easily as it was given (see section 7).
Right to grievance redressal	To have your complaint about our data handling addressed by our Grievance Officer within the statutory timeline (see section 22).
Right to nominate	To nominate another individual to exercise these rights on your behalf in the event of your death or incapacity.

How to exercise your rights

Many of these you can do yourself from your account: update your profile and addresses, delete saved addresses, change notification preferences, or request account deletion. For anything else, write to our Grievance Officer using the details in section 22, with enough information for us to identify you and understand your request.

We will respond within **[30]** days. If we cannot fully act on a request — because we are legally required to keep a tax invoice, for example — we will tell you why. We may ask you to verify your identity before acting, to make sure we are not disclosing your data to someone else. There is no charge for exercising these rights, though we may decline, or charge a reasonable fee for, requests that are manifestly excessive or repetitive.

If you are not satisfied with our response, you may escalate your complaint to the Data Protection Board of India in the manner prescribed under the DPDP Act.

Your duties as a Data Principal. The DPDP Act also asks you not to impersonate another person when providing data, not to suppress material information when providing data for a document or identity proof, and not to file false or frivolous grievances.

17. Children's data

Krozenda is not intended for children. You must be at least 18 years old to create an account and transact on the platform. We do not knowingly collect personal data from anyone under 18. Where processing a child's data becomes unavoidable, we will obtain verifiable consent from a parent or lawful guardian, and we will not undertake tracking, behavioural monitoring, or targeted advertising directed at children.

If you believe a child has provided us with personal data, contact our Grievance Officer and we will delete it promptly.

18. Cross-border transfers

Our primary data storage and processing takes place in India. Some of our service providers may process limited data on servers outside India — push-notification delivery infrastructure, for example. Where that happens:

- we transfer only the minimum data needed for that service;
- we do not transfer personal data to any country or territory that the Central Government has restricted for this purpose; and
- we require the recipient by contract to apply protections equivalent to those in this policy.

19. Data breach handling

We maintain an incident-response process for suspected personal data breaches. In the event of a breach we will contain and investigate it, assess the risk to affected individuals, and notify the Data Protection Board of India and every affected Data Principal in the form and within the timelines prescribed by law. We will also report the incident to CERT-In where the Information Technology Act and its directions require it. Our notice will describe, so far as we know it, the nature and extent of the breach, its likely consequences, the measures we have taken, and what you can do to protect yourself.

20. Third-party links and services

The platform may contain links to third-party websites, seller storefront links, or promotional content operated by others. This policy does not cover those services. We do not control them and are not responsible for their privacy practices. Please read their privacy policies before providing them with personal data.

21. Changes to this policy

We may update this Privacy Policy from time to time to reflect changes in our services, our service providers, or the law. When we do, we will revise the "Last updated" date at the top of this document and publish the new version on the platform.

If a change is material — a new purpose of processing, or a new category of recipient — we will notify you in advance by email, SMS or an in-app notice, and where the law requires it we will ask for your fresh consent. Each version of this policy is retained along with the record of your acceptance, so it is always possible to establish which version you agreed to and when.

22. Grievance redressal

In accordance with the Digital Personal Data Protection Act, 2023, the Information Technology (Intermediary Guidelines and Digital Media Ethics Code) Rules, 2021, and the Consumer Protection (E-Commerce) Rules, 2020, we have appointed a Grievance Officer to address your concerns about your personal data or your use of the platform.

Grievance Officer	Details
Name	[Full name of Grievance Officer]
Designation	[Designation]
Email	[grievance@krozenda.com]
Phone	[+91 XXXXX XXXXX]
Postal address	[Full address, City, State, PIN]
Working hours	[Monday to Friday, 10:00–18:00 IST]

How we handle your grievance:

- We acknowledge every complaint within [48] hours of receipt.
- We resolve complaints within [30] days, or sooner where the law prescribes a shorter period.
- We give you a ticket reference so that you can track progress.
- If you remain dissatisfied, you may approach the Data Protection Board of India, or the appropriate consumer forum, in accordance with applicable law.

Please raise your complaint with us first — the DPDP Act requires a Data Principal to exhaust the Data Fiduciary's grievance mechanism before approaching the Board.
